Experience

Frontend & Backend Development Training

Self-Directed Training Under an Industry Professional

Received structured, hands-on training from an experienced software developer.

- Learned practical workflows used in real-world projects including frontend development, backend APIs, Git, and deployment.
- Worked on multiple guided assignments and mini-projects to strengthen problem-solving and development skills.
- Gained confidence in working with JavaScript, React, Node.js, Express, MongoDB, and UI/UX basics.
- Although not under a formal organization, the training was aligned with industry standards and real project practices.
